

iglooMortise Compatibility Chart

Thank you for your interest in the igloohome Smart Mortise! Please take a look at the compatibility chart to ensure that your door is compatible with the Smart Mortise!

Installation of Mortise

Installation of Mortise

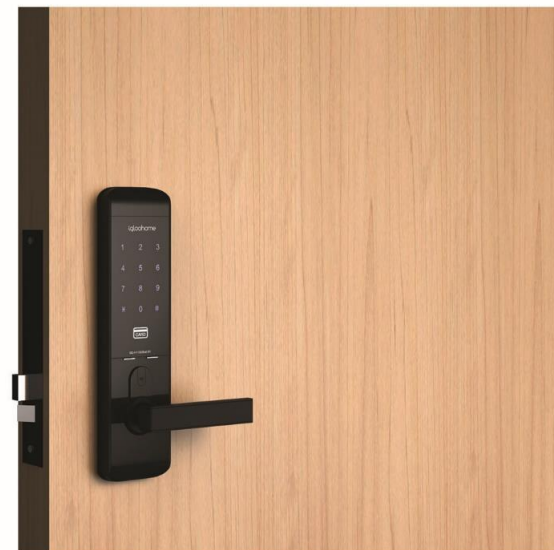

Roller Mortise (with long handle bar)

For igloohome Mortise installations on doors with long handlebars, please ensure you have received approval from the management/landlord to remove the handlebar. Otherwise, we would recommend the Deadbolt 02 model instead.

BEFORE

AFTER

iglooMortise Installation – door criteria

Step 1: Check door material and thickness

Door material: Wooden Door and Wooden Door Frame

Door thickness: 40mm to 60mm

Sample 1
(with Smart Mortise)

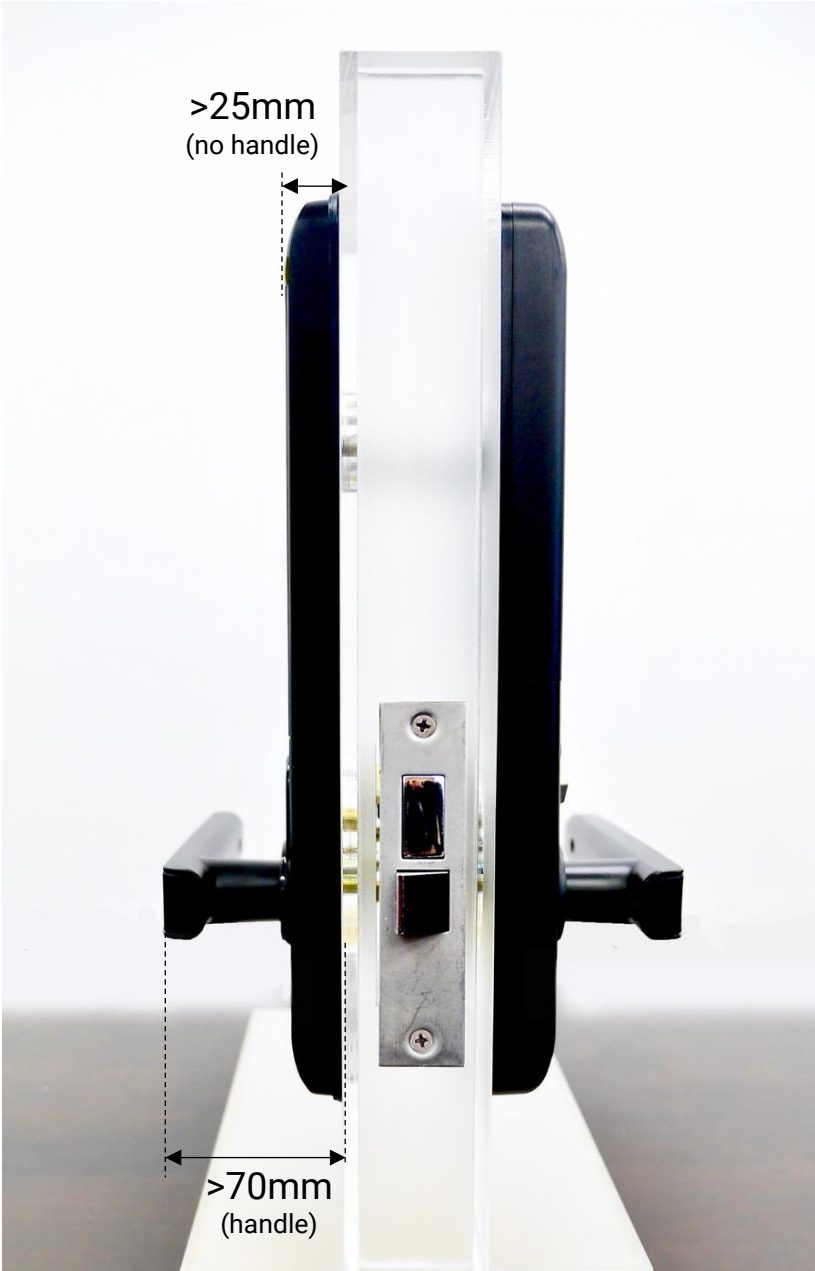

Sample 2
(with
existing
door
handle)

Step 2: Check clearance between door and gate

Distance between door and gate for Mortise: at least 70 mm

Step 3: Check clearance from edge of door

Clearance for Mortise: at least 190mm

Entire clearance area for Mortise must be unobstructed and wood material. Please check for clearance on both sides of the door.

Step 4: Check for clearance for height of lock

Height of lock: 305mm

Entire clearance area for Mortise must be unobstructed and wood material.

*If your door has existing holes, please measure the distance between the holes, above, and below.
